3 Hours Before the Deadline.

The proposal isn't even in Word yet.

The formatting nightmare

😩

The research is done —
formatting isn't

📐

Running head? 1" margins?
Double-spacing? Hanging indent?

🔄

Word formatting broke again
Third time fixing it...

⏰

Time is running out
Still stuck on formatting

What if this time went to actual research?

What if one command did it?

A built-in Claude Code Skill — no setup needed

/docx Skill

📝 One prompt → perfect .docx

🎓 Auto APA 7th formatting

📄 Title page · abstract · references included

⚡ Revisions in plain language — "shorten the abstract"

Anthropic Official Skill · Built into Claude Code

1 Type this prompt

Claude Code

```
› claude

"Write a research proposal on
AI-assisted feedback in higher
education.
APA 7th format.
Include title page, abstract,
and references."

---

# Claude activates docx Skill automatically…

# /docx → Word document generation begins
```

💡 *Copy this prompt and use it right away*

2 Claude builds it all

Claude Code — generating proposal.docx

● Creating proposal.docx ...

✓ **Title page** — Running head, affiliations, author note

✓ **Abstract** — 250 words + 5 keywords

✓ **Headings** — Level 1-3 APA 7th format

✓ **Introduction** — Background and purpose

✓ **Lit Review** — Prior research analysis

✓ **Method** — Design, participants, procedures

✓ **Expected Results** — Hypothesis-driven analysis plan

✓ **References** — Hanging indent, DOI hyperlinks

✓ **Format** — 12pt Times New Roman, 1" margins, double-spaced

✓ ✅ **Done** — proposal.docx saved (~/research/)

3 Result: submission-ready

The Impact of AI-Assisted Feedback on Student Academic Performance in Higher Education

Author Name
Department of Education
Pennsylvania State University

Author Note

Abstract

This study investigates the impact of AI-assisted feedback systems on student academic performance and self-regulated learning in higher education. Using a mixed-methods approach, 200 graduate students are examined over one semester to evaluate AI feedback intervention effectiveness. Pre-post assessments and semi-structured interviews measure changes in academic achievement, self-efficacy, and learning strategies. Grounded in Vygotsky's Zone of Proximal Development (ZPD) theory and Hattie & Timperley's (2007) feedback model, this study aims to elucidate the mechanisms through which AI-generated immediate and personalized feedback enhances learners' metacognitive abilities and academic self-efficacy.

Keywords: AI feedback, higher education, academic performance, self-regulated learning, mixed methods

✨ *12pt TNR · double-spaced · 1" margins · full APA 7th*

Document Format
12pt TNR · double-spaced · 1" margins · page numbers

✓

Before vs After

✕ Before

- ⏰ 2-3 hours formatting
- 📖 Checking APA manual
- 🔍 Hunting for templates
- 😤 Formatting breaks overnight
- 🔄 Topic change = restart

✓ After

- ⚡ 30 seconds one prompt
- 🎯 APA 7th auto-applied
- 📄 Instant .docx output
- ✏️ Revisions in plain language
- ♻️ New topic? Just ask again

Let Claude handle the formatting.

Your time belongs to research.
